No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     of hits satisfying chosen parameters:

Sequence 299, Application US/09556877

Patent No. 6432916

GENERAL INFORMATION:

APPLICANT: Probst, Peter

APPLICANT: Bhatia, Ajay

APPLICANT: Skeiky, Yasir

APPLICANT: Hing, Steve

APPLICANT: Maisonneuve, Jeff

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR TREATMENT AND TITLE OF INVENTION: DIAGNOSIS OF CHLAMYDIAL INFECTION

FILE REFERENCE: 210121.469C5

CURRENT APPLICATION NUMBER: US/09/556,877

CURRENT FILING DATE: 2000-04-19

NUMBER OF SEQ ID NOS: 305

GENERAL INFORMATION:

APPLICANT: Lynn Doucette-Stamm et al

APPLICANT: Lynn Doucette-Stamm et al

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO STAPHYLOCOCCUS

TITLE OF INVENTION: EPIDERMIDIS FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: GTC-007

CURRENT APPLICATION NUMBER: US/09/134,001C

CURRENT APPLICATION NUMBER: US 60/064,964

PRIOR FILING DATE: 1997-11-08

PRIOR APPLICATION NUMBER: US 60/055,779

PRIOR FILING DATE: 1997-08-14

PRIOR FILING DATE: 1997-08-14
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Query Match

US-08-353-700-1

Sequence 1, Application US/08353700
Patent No. 5599919
GENERAL INFORMATION:
APPLICANT: YEN, TIMOTHY J.
APPLICANT: RATTNER, JEROME B.
TITLE OF INVENTION: MUCLEIC ACID ENCODING APPLICANT: TRANSIENTLY-EXPRESSED

A KINETOCHORE PROTEIN,

```
; LENGTH: 1093 amino acids
; TYPE: AMINO ACID
; STRANDEDNESS: unknown
; TOPOLOGY: unknown
; MOLECULE TYPE: protein

US-08-006-676B-1
Sequence 1, Application US/08006676B
Patent No. 5411865
; GENERAL INFORMATION:
APPLICANT: Reed, Steven
TITLE OF INVENTION: Diagnosis of Leishmaniasis
NUMBER OF SEQUENCES: 3
CORRESPONDENCE ADDRESS:
ADDRESSEE: Jeffrey B. Oster
STREET: 8339 SE 57th Street
CITY: Mercer Island
STATE: Washington
COUNTRY: USA
ITP: 98040-4906
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatable
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: WORD for Windows
CURRENT APPLICATION DATA:
